

THE P COMPETENCY MODEL

© P - ASSESSMENTS CAREERS - ZÜRICH HAMBURG / profcon GmbH

Our competency model is the basis for selection and development assessments. Accordingly, we integrate it into our coaching and training work. It was established on the analysis of megatrends as well as company success factors, and with our experience and know-how, adapted for practicability and pragmatics.

The P competency model has two basic dimensions: ability and willingness.

For your assessment, we adapt the P-competency profile to the requirements profile of your respective functional category: expert, team and project management, middle or upper management. Subsequently, assessment-specific criteria are created to measure the match between the intended role and the assessment candidate.
